Bending of Laminated Anisotropic Composite Cylinders, p. 394

ZWEBEN, C.
Load Concentration Factors for Circular Holes in Composite Laminates, p. 387

SUBJECT INDEX

Acoustic Emission
Acoustic Emission Produced During Burst Tests of Filament-Wound Bottles, p. 320

Anisotropic Composite Materials
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Anisotropic Cylinders
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Anisotropic Laminates
The Yield Criterion of Laminated Media, p. 22

Anisotropic Materials
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Anisotropy, Material
Inplane and Bending Fields of Anisotropic Generally Laminated Plate Strips, p. 536

ATJS Graphite
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Beams
Simplified Analysis of Static Shear Factors for Beams of Nonhomogeneous Cross Section, p. 525

Bending Analysis
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Bending Fields
Inplane and Bending Fields of Anisotropic Generally Laminated Plate Strips, p. 536

Bend Tests
Fracture Toughness of Carbon-Carbon Composites, p. 2

Bending Test
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Boron-Aluminum Composites
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Boron Carbide Ribbon
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Boron-Epoxy
On the Off-Axis Strength Test for Anisotropic Materials, p. 246
Theoretical Post-Yielding Behavior of Composite Laminates, Part II–Inelastic Macromechanics, p. 310

Bounds
Effect of Fiber Positioning on the Effective Physical Properties of Composite Materials, p. 466

Buckling Stress (Analysis)
Nonlinear Behavior of Laminated Composites, p. 257

Bulk Compressibility
Bulk Compressibility of Carbon Fibre Reinforced Plastics, p. 138

Carbon Composite
Interlaminar Shear Strength of a Carbon Fibre Reinforced Composite Material Under Impact Conditions, p. 129

Carbon-Carbon Composites
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36
Fracture Toughness of Carbon-Carbon Composites, p. 2
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Carbon Epoxy
Interlaminar Shear Strength of a Carbon Fibre Reinforced Composite Material Under Impact Conditions, p. 129
Dynamic Mechanical Properties of Graphite-Epoxy and Carbon-Epoxy Composites, p. 160
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53

Carbon-Felt Composite
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36

Carbon Fibers
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288
The Application of the Principles of Linear Elastic Fracture Mechanics to Unidirectional Fiber Reinforced Composite Materials, p. 430

Carbon Fibre Composites
Bulk Compressibility of Carbon Fibre Reinforced Plastics, p. 138

Carbon Microstructure
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36

Chemical Vapor Deposition
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36

Circular Holes
Load Concentration Factors for Circular Holes in Composite Laminates, p. 387

Compacted Felt
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36

Complementary Energy Density
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Complexity
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Composite Characterizations
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Composite Cylinders
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Composites, Carbon Fibre/Epoxy
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Compressible Composite
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482

Crack Extension
Fracture Analysis of Unidirectional Composites, p. 230

Crack Propagation
Crack Measurements in Composite Materials, p. 134

Critical Column Loads
Shear Coefficients for Orthotropic Beams, p. 530

Critical Strain Energy Release Rate
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Critical Stress Intensity Factor
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Crystalline Alterations
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288

Damage, Cumulative
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Damping
Dynamic Mechanical Properties of Graphite-Epoxy and Carbon-Epoxy Composites, p. 160
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Damping, Mechanical
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Deformation
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516

Delamination
Fracture Toughness of Carbon-Carbon Composites, p. 2
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Design
A Fatigue Criterion for Fiber Reinforced Materials, p. 448

Effect of Fiber Positioning on the Effective Physical Properties of Composite Materials, p. 466
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288
Tensile Strength of Notched Composites, p. 218
Toward Reliable Composites: An Examination of Design Methodology, p. 298
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Direction of Crack Initiation
Fracture Analysis of Unidirectional Composites, p. 230

Dynamic Elastic Moduli
Dynamic Mechanical Properties of Graphite-Epoxy and Carbon-Epoxy Composites, p. 160

Dynamic Moduli
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53

Dynamic Testing
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Elastic Constants
The Propagation of Waves from a Cylindrical Cavity, p. 90

Elastic Modulus
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Elastoplastic Transverse Properties
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482

Epoxy Composites
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288

Epoxy Matrix
The Application of the Principles of Linear Elastic Fracture Mechanics to Unidirectional Fiber Reinforced Composite Materials, p. 430

Fatigue
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Fatigue Failure
A Fatigue Criterion for Fiber Reinforced Materials, p. 448

Fatigue Life
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Fiber Failure
A Fatigue Criterion for Fiber Reinforced Materials, p. 448

Fiber Orientation
A Fatigue Criterion for Fiber Reinforced Materials, p. 448
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
The Application of the Principles of Linear Elastic Fracture Mechanics to Unidirectional Fiber Reinforced Composite Materials, p. 430

Fiber Positioning
Effect of Fiber Positioning on the Effective Physical Properties of Composite Materials, p. 466

Fiber Reinforced Composites
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516
Shear Coefficients for Orthotropic Beams, p. 530
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Fiber Reinforced Plastics
Crack Measurements in Composite Materials, p. 134

Fiber Variation
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Fiberglass Reinforced Plastics
Fracture Analysis of Unidirectional Composites, p. 230

Fiber-to-Matrix Bonding
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288

Fibre Reinforced Solid
The Propagation of Waves from a Cylindrical Cavity, p. 90

Filament Winding
Acoustic Emission Produced During Burst Tests of Filament-Wound Bottles, p. 320

Filament-Wound Composites
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Finite Element Analysis
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Finite Elements
Theoretical Post-Yielding Behavior of Composite Laminates, Part I—Inelastic Micromechanics, p. 178
Theoretical Post-Yielding Behavior of Composite Laminates, Part II—Inelastic Macromechanics, p. 310
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Flexure
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53

Fractography
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Fracture
Load Concentration Factors for Circular Holes in Composite Laminates, p. 387

Tensile Strength of Notched Composites, p. 218
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Fracture Mechanics
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146
The Application of the Principles of Linear Elastic Fracture Mechanics to Unidirectional Fiber Reinforced Composite Materials, p. 430

Fracture Specimens
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Fracture Toughness
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146
Fracture Analysis of Unidirectional Composites, p. 230
Fracture Toughness of Carbon-Carbon Composites, p. 2

Fracture Toughness, Dynamic
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Geologic Composites
Steady Shock Waves in Composite Materials, p. 277

Glass-Epoxy
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53

Glass Fabric
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146

Glass Mat
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146

Graphite
Fracture Toughness of Carbon-Carbon Composites, p. 2

Graphite and Boron-Epoxy
Tensile Strength of Notched Composites, p. 218

Graphite-Epoxy Composites
Dynamic Mechanical Properties of Graphite-Epoxy and Carbon-Epoxy Composites, p. 160

Graphite-Epoxy Fracture Specimens
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Higher Order Elastic Moduli
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Hugoniot Analysis
Steady Shock Waves in Composite Materials, p. 277

Hyperelastic Materials
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Impact Loads
Interlaminar Shear Strength of a Carbon Fibre Reinforced Composite Material Under Impact Conditions, p. 129

Impact Testing, Instrumented
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Incompressible Composite
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482

Inelastic Analysis
Theoretical Post-Yielding Behavior of Composite Laminates, Part II–Inelastic Macromechanics, p. 310

Inelastic Behavior
Theoretical Post-Yielding Behavior of Composite Laminates, Part I–Inelastic Micromechanics, p. 178

Inertial Loading Effects
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Inplane Fields
Inplane and Bending Fields of Anisotropic Generally Laminated Plate Strips, p. 536

Interlaminar Effect
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Interlaminar Shear
Interlaminar Shear Strength of a Carbon Fibre Reinforced Composite Material Under Impact Conditions, p. 129

Irradiation Strengthening
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288

Laminate Geometry
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402

Laminated Composites
Nonlinear Behavior of Laminated Composites, p. 257

Laminated Cylinders
Bending of Laminated Anisotropic Composite Cylinders, p. 394

Laminated Plates
Inplane and Bending Fields of Anisotropic Generally Laminated Plate Strips, p. 536

Laminated Plates, Beams
Simplified Analysis of Static Shear Factors for Beams of Nonhomogeneous Cross Section, p. 525

Laminates
A Note on Determination of the Shear Stress-Strain Response of Unidirectional Composites, p. 383
Load Concentration Factors for Circular Holes in Composite Laminates, p. 387
Propagation of Shock Waves in Anisotropic Composite Plates, p. 366
Tensile Strength of Notched Composites, p. 218

Linear Elastic Fracture Mechanics
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Load Concentration
Load Concentration Factors for Circular Holes in Composite Laminates, p. 387

Matrix Cracking
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Matrix Failure
A Fatigue Criterion for Fiber Reinforced Materials, p. 448

Mechanical Behavior Prediction
Theoretical Post-Yielding Behavior of Composite Laminates, Part II–Inelastic Macromechanics, p. 310

Mechanical Properties
Bulk Compressibility of Carbon Fibre Reinforced Plastics, p. 138
Dynamic Mechanical Properties of Graphite-Epoxy and Carbon-Epoxy Composites, p. 160
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Metal Matrix Composites
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Micromechanics
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Mixed Mode Fracture
Fracture Analysis of Unidirectional Composites, p. 230

Moire Fringes
Crack Measurements in Composite Materials, p. 134

Natural Modes
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Neutron Irradiation
Improved Mechanical Properties of Composites Reinforced with Neutron-Irradiated Carbon Fibers, p. 288

Nondestructive Testing
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Nonlinear Behavior
Nonlinear Behavior of Laminated Composites, p. 257

Nonlinear Elastic Behavior
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Nonlinear Response
On the Off-Axis Strength Test for Anisotropic Materials, p. 246
Theoretical Post-Yielding Behavior of Composite Laminates, Part I–Inelastic Micromechanics, p. 178

Notch Root Radius
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Off-Axis Behavior
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Off-Axis Tensile Test
On the Off-Axis Strength Test for Anisotropic Materials, p. 246

Orthotropic Beams
Shear Coefficients for Orthotropic Beams, p. 530

Plastic Behavior
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Plates
Propagation of Shock Waves in Anisotropic Composite Plates, p. 366

Polyaxial Stress-Strain Relation
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482

Polyesters
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146

Post-Yielding
Theoretical Post-Yielding Behavior of Composite Laminates, Part I–Inelastic Micromechanics, p. 178

Pyrolytic Carbon
Carbon-Felt, Carbon-Matrix Composites: Dependence of Thermal and Mechanical Properties on Fiber Volume Percent, p. 36

Rail Shear Test
In-Plane Shear Stress-Strain Response of Unidirectional Composite Materials, p. 124

Random Loads
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Ray
Propagation of Shock Waves in Anisotropic Composite Plates, p. 366

Reinforced Plastics
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Reinforcement
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Reliability
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Residual Strength
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Resins, Epoxy
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Ribbon-Shaped Reinforcement
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Scaling
Toward Reliable Composites: An Examination of Design Methodology, p. 298

Scotchply 1002
Fracture Analysis of Unidirectional Composites, p. 230
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516

Shear Coefficients
Shear Coefficients for Orthotropic Beams, p. 530

Shear Coupling
A Note on Determination of the Shear Stress-Strain Response of Unidirectional Composites, p. 383

Shear Deformation
Propagation of Shock Waves in Anisotropic Composite Plates, p. 366
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Shear Factors
Simplified Analysis of Static Shear Factors for Beams of Nonhomogeneous Cross Section, p. 525

Shear Modulus, Strength
Bulk Compressibility of Carbon Fibre Reinforced Plastics, p. 138

Shear Nonlinearity
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Shear Stress-Strain Relation
In-Plane Shear Stress-Strain Response of Unidirectional Composite Materials, p. 124

Shock Waves
Propagation of Shock Waves in Anisotropic Composite Plates, p. 366
Steady Shock Waves in Composite Materials, p. 277

Smearing Technique
The Yield Criterion of Laminated Media, p. 22

Specimen Variables
The Effect of Specimen and Testing Variables on the Fracture of Some Fibre Reinforced Epoxy Resins, p. 76

Stiffness
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Strain Energy Density Factor, Theory
Fracture Analysis of Unidirectional Composites, p. 230

Strain Measurements
Crack Measurements in Composite Materials, p. 134

Strength
Interlaminar Shear Strength of a Carbon Fibre Reinforced Composite Material Under Impact Conditions, p. 129

Strength Analysis
Tensile Strength of Notched Composites, p. 218

Strength Criteria
On the Off-Axis Strength Test for Anisotropic Materials, p. 246

Strength Tensor
On the Off-Axis Strength Test for Anisotropic Materials, p. 246

Stress
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516

Stress Components
The Propagation of Waves from a Cylindrical Cavity, p. 90

Stress Intensity Factor
Critical Stress Intensity Factors Applied to Glass Reinforced Polyester Resin, p. 146
Fractographic Study of Graphite-Epoxy Laminated Fracture Specimens, p. 272

Stress-Strain Relations
Nonlinear Behavior of Laminated Composites, p. 257

Stress-Strain Response
A Note on Determination of the Shear Stress-Strain Response of Unidirectional Composites, p. 383

Symmetry
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Tensile Fracture Strength
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Theory of Interacting Continuation
Steady Shock Waves in Composite Materials, p. 277

Thermal Conductivity
Effect of Fiber Positioning on the Effective Physical Properties of Composite Materials, p. 466

Thermal Strains
Yielding in Unidirectional Composites Under External Loads and Temperature Changes, p. 194

Titanium Matrix
Tensile Properties of Boron Carbide Ribbon in Titanium Matrix, p. 521

Torsion
Effect of Fibre Orientation and Laminate Geometry on the Dynamic Properties of CFRP, p. 402
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53

Torsional Moduli
Bulk Compressibility of Carbon Fibre Reinforced Plastics, p. 138

Torsional Testing
Effects of Shear Damage on the Torsional Behavior of Carbon Fibre Reinforced Plastics, p. 68

Ultrasonic Attenuation Measurements
Influence of Stress Upon Internal Damping in a Fiber Reinforced Composite Material, p. 516

Uniaxial Stress-Strain Curve
Elastoplastic Transverse Properties of a Unidirectional Fibre Reinforced Composite, p. 482

Uniaxial Tension
A Note on Determination of the Shear Stress-Strain Response of Unidirectional Composites, p. 383
Nonlinear Behavior of Laminated Composites, p. 257

Unidirectional Composites
A Note on Determination of the Shear Stress-Strain Response of Unidirectional Composites, p. 383
Shear Coefficients for Orthotropic Beams, p. 530
Theoretical Post-Yielding Behavior of Composite Laminates, Part I–Inelastic Micromechanics, p. 178

Unidirectional Laminae
Nonlinear Elastic Behavior of Unidirectional Composite Laminae, p. 102

Vibration
The Dynamic Properties of Unidirectional Fibre Reinforced Composites in Flexure and Torsion, p. 53
Vibration Characteristics of Aluminum Plates Reinforced with Boron-Epoxy Composite Material, p. 348

Voids
The Effect of Void and Fiber Variations on the Accuracy of Composite Material Characterizations, p. 500

Wave Propagation
The Propagation of Waves from a Cylindrical Cavity, p. 90

Weight-Critical Compression Members
Shear Coefficients for Orthotropic Beams, p. 530

Work of Fracture
Fracture Toughness of Carbon-Carbon Composites, p. 2

Work of Fracture, Dynamic
The Dynamic Fracture Toughness of Carbon-Carbon Composites, p. 334

Yield Criterion
The Yield Criterion of Laminated Media, p. 22
